## Match product purchase for additional rebate dollars in 2019-2020

| Product Purchases   | Rebate \$/Unit | Unit  |
|---|----------------|-------|
| Defendor® specialty herbicide<br>Matched with Dimension® specialty herbicide or Dimension on fertilizer | \$80.00        | quart |

Purchase the equivalent Dimension specialty herbicide on fertilizer, Dimension Ultra 40WP, or Dimension 2EW equal to or greater than 0.25 pounds a.i. per acre (1 pint per acre or higher), equal to the number of treated acres of Defendor specialty herbicide purchased. Rebate is paid on Defendor purchases only. In order to receive this additional rebate amount, you must submit both your Defendor and Dimension 2EW purchases at the same time.

(i.e. 1 quart of Defendor equals 8 acres treated at 4oz. per acre. Therefore, if you were buying a 50 lb bag of fertilizer with a Dimension load rate of 0.21% a.i., you would need to purchase at least 19 bags per 1 quart of Defendor).

One pint of Dimension equals 0.25 pounds a.i. per acre. Dimension 2EW product sizes included are the 0.5 gal, 2.5 gal, and 30 gal. Dimension 2EW bulk or the Dimension + Defendor Value Pak are not included in the quantities for the matching, nor included in this additional rebate payout.

This rapid-acting, postemergent, contact herbicide provides quick knockdown as a tank-mix partner in combination with other herbicides. Get improved efficacy compared to a broadleaf herbicide alone. Nothing controls silvery thread moss on greens and tees quite like QuickSilver® T&O herbicide.

This novel combination of sulfentrazone and carfentrazone increases tuber mortality within 24 hours and reduces future outbreaks of yellow nutsedge, green kyllinga and 45 other weeds. Plus, with no known resistance, you get proven control of ALS-resistant sedge.

**Triple Crown Golf insecticide is a Restricted Use Pesticide (RUP).** <sup>1</sup> Control defined as at least 90% control for at least 100 days from the initial Echelon herbicide application. DAIT = Days After Initial Treatment. Purple nutsedge is not included in this Performance Assurance Program. Echelon herbicide will not control DNA-resistant goosegrass. Percent control is at the discretion of the FMC representative(s) investigating performance claims. <sup>2</sup> Crabgrass control is limited to labeled types of crabgrass, including large and smooth varieties. Blanket crabgrass is expressly not included in this Performance Assurance Program.

The Echelon® Herbicide Performance Assurance Program for Bermudagrass will change how you look at your spring preemergence herbicide program. When applied according to the label directions for preemergence applications, Echelon herbicide will provide at least 100 days of preemergence control<sup>1</sup> of crabgrass<sup>2</sup>, goosegrass, yellow nutsedge and green kyllinga. If it fails, FMC will provide an appropriate product to control any remaining weeds at no cost to you.

Fame SC fungicide delivers excellent results on brown patch, fairy ring and pythium root dysfunction with plant health benefits.
