Fall Forward

2020 FALL FORWARD

Participating in SynaTek's 2020 Fall Forward Program could not be easier. Simply make a commitment to purchase by December 11, 2020, take delivery by the dates outlined below and remit payment by June 8, 2021.

Synatek Rewards Program

Participants in the 2020 Fall Forward Program will be able to benefit from rebates of up to 10% from purchase commitments made by December 11, 2020. Agency products offered by Syngenta, SePro and FMC are not eligible for SynaTek Rewards. Please refer to the end user programs offered by each of these manufacturers for a complete detail of eligible rebates.

Rebate Tiers as follows:

\$2,500 - \$4,999	2%
\$5,000 - \$19,999	4%
\$20,000 - \$39,999	6%
\$40,000 - \$59,999	8%
\$60,000 - Above	10%

For example, if a \$20,000 purchase commitment was made from qualifying manufacturers by December 11, 2020 you would receive a \$1,200 rebate based upon a rewards level of 6%. Rebates will be paid out by August 31, 2021 provided that shipment of the product takes place by the dates outlined below and payment is received by June 8, 2021.

* In the event that the product is not shipped or paid for within the terms of the Fall Forward Program then all rebates will be forfeited.

Extended Delivery & Payment Terms

Participants in the 2020 Fall Forward Program will benefit from extended delivery and payment terms. All purchase commitments received by December 11, 2020 will be able to defer delivery until the dates outlined below with payment for the product not being due until June 8, 2021.

Delivery Deadlines

Packaged: March 26, 2021

Granular: March 26, 2021

Liquid: July 31, 2021

* In the event that the product is not shipped or paid for within the terms of the Fall Forward Program then all rebates will be forfeited.

Early Pay Discounts

The following payment discounts are available for customer's who elect to pay for their early order commitment prior to the June 8, 2021 due date.

6% if paid by December 11, 2020

3% if paid by March 26, 2021

2% if paid by April 30, 2021

Product Swap

Participants in the 2020 Fall Forward Program will be able to make purchase commitments from qualifying manufacturers without needing to fully predict disease and insect pressures for the coming season. The Fall Forward Product Swap will allow you to exchange up to 25% of your control product purchases (excluding control product on fertilizer) until July 10, 2021 once you have a stronger gauge of your course's particular needs. The exchange privileges are offered on a one-time basis and must be exchanged for products with an equal or greater price compared to the products being exchanged. For example, if you made a \$10,000 purchase commitment by December 11, 2021 for eligible products you would be able to exchange up to \$2,500 of those products on a one-time basis by July 10, 2021 with a minimum of \$2,500 in other eligible products.

Price Guarantee

Participants in the 2020 Fall Forward Program will be able to make purchase commitments on all control products (excluding control product on fertilizer) without the budgetary stress and strain of trying to predict the future of product pricing. The Fall Forward Price Guarantee will ensure that the product price you receive in the commitment period offered through December 11, 2020 will be the lowest offered price through September 10, 2021. If prices decline you will not only receive the lower price for any subsequent purchases, but you will also be credited the difference for any products previously purchased. For example, if you committed to purchase one case of Iprodione by December 11, 2020 at \$256.00 and then on July 6, 2021 the case price dropped to \$200.00 we would automatically rebate you the \$56.00 difference as a result of the change in price. Furthermore, if prices increase you will not see any change in your pricing structure. For example, if you committed to purchase one case of Iprodione by December 11, 2020 at \$256.00 and then on July 6, 2021 the price increased to \$290.00 per case you would continue to receive the \$256.00 per case price offered to you during the commitment period. **Excludes all MLP and Agency pricing.**

What's Included?

19-0-4 (35% CRN) w/TriForce™

19-0-4 (35% CRN) with TriForce™ has been specifically engineered to maintain a strong base of downward root growth without promoting shoot growth. TriForce contains three essential products Colony Complete, Paleo, and BioGrowth. These products are responsible for nutrient stabilization, thatch reduction, and new root growth development. This blend also includes Triazone a slow release and free Nitrogen. At the 1/8 lb rate it provides you with a consistent nutrient release over two weeks.

These products include magnesium, boron, cobalt, copper, iron, manganese, molybdenum and zinc. It contains the non-plant food ingredient fulvic acid to improve nutrient availability to the turf, enhance photosynthesis, and magnify root growth. MicroTek boasts an 8:5 iron to magnesium ratio outpacing the competition in both available nutrients and quick green.

The Volution™ Solution Bundle

The Volution™ products Clean, Start, Control and Activate will provide you with the necessary adjuvants for an effective and economical spray application.

STEP 1

Volution™ Clean is a high performing and easy to use mix tank and spray system cleaner. Clean is formulated with a combination of detergents and emulsifiers that helps to clean and solubilize residues. Clean will penetrate dried on residues to free them up and get it back into a sprayable solution.

Clean also helps to solubilize oily residues from emulsifiable concentrates or oil based formulations to ensure that any leftover active ingredient is eliminated.

Clean is a non-corrosive formula which can have negative effect on your pumps, hoses and fittings.

STEP 2

Volution™ Start is a pH acidifier that protects spray mixes from loss of performance associated with high pH. Start is formulated with a citric acid that safely lowers pH to ensure performance of sensitive chemistries. It also contains a surfactant that reduces the surface tension of your spray solution to allow less soluble products to get into a good homogenous mix.

Start includes an antifoam to reduce foaming during agitation.

STEP 3

Volution™ Control is formulated with a combination of modified vegetable oils to reduce driftable fines and get more of the intended product to the targeted leaf surface.

Control also reduces droplet bounce for your spray solution by absorbing the kinetic energy that a spray droplet gains when leaving the nozzle and heading towards the plant.

Control has low use rates and mixes very well with limited agitation.

STEP 4

Activate is a non-ionic surfactant that increases coverage for better uptake. It also uses a unique and advanced polymeric component that safely increases penetration across waxy cuticles for plant better utilization.

Bundle Includes

- 1 Case Of Each
- 4 X 1 Gallons Volution Clean
- 4 X 1 Gallons Volution Start
- 4 X 1 Gallons Volution Activate
- 4 x 1 Gallons of Volution Control
