

2018 **FALL** FORWARD™

Participating in SynaTek's 2018 Fall Forward Program could not be easier. Simply make a commitment to purchase by December 14, 2018, take delivery by the dates outlined below and remit payment by June 7, 2019.

Synatek Rewards Program

Participants in the 2018 Fall Forward Program will be able to benefit from rebates of up to 10% from purchase commitments made by December 14, 2018. Agency products offered by Syngenta, SePro and FMC are not eligible for SynaTek Rewards. Please refer to the end user programs offered by each of these manufacturers for a complete detail of eligible rebates.

Rebate Tiers as follows:

\$2,500 - \$4,999	2%
\$5,000 - \$19,999	4%
\$20,000 - \$39,999	6%
\$40,000 - \$59,999	8%
\$60,000 - Above	10%

For example, if a \$20,000 purchase commitment was made from qualifying manufacturers by December 14, 2018 you would receive a \$1,200 rebate based upon a rewards level of 6%. Rebates will be paid out by August 31, 2019 provided that shipment of the product takes place by the dates outlined below and payment is received by June 7, 2019. In the event that the product is not shipped or paid for within the terms of the Fall Forward Program then all rebates will be forfeited.

Extended Delivery & Payment Terms

Participants in the 2018 Fall Forward Program will benefit from extended delivery and payment terms. All purchase commitments received by December 14, 2018 will be able to defer delivery until the dates outlined below with payment for the product not being due until June 7, 2019.

Bulk Liquid Products by July 31, 2019

Packaged Products by March 29, 2019

Granular Fertilizer by March 29, 2019

Early Pay Discounts

The following payment discounts are available for customer's who elect to pay for their early order commitment prior to the June 7, 2019 due date.

Payment by **December 14, 2018** will receive a discount of 6.0%

Payment by **March 29, 2019** will receive a discount of 3.0%

Payment by **April 30, 2019** will receive a discount of 2.0 %

Product Swap

Participants in the 2018 Fall Forward Program will be able to make purchase commitments from qualifying manufacturers without needing to fully predict disease and insect pressures for the coming season. The Fall Forward Product Swap will allow you to exchange up to 25% of your control product purchases (excluding control product on fertilizer) until July 14th once you have a stronger gauge of your course's particular needs. The exchange privileges are offered on a one time basis and must be exchanged for products with an equal or greater price compared to the products being exchanged. For example, if you made a \$10,000 purchase commitment by December 14, 2018 for eligible products you would be able to exchange up to \$2,500 of those products on a one-time basis by July 13, 2019 with a minimum of \$2,500 in other eligible products.

Price Guarantee

Participants in the 2018 Fall Forward Program will be able to make purchase commitments on all control products (excluding control product on fertilizer) without the budgetary stress and strain of trying to predict the future of product pricing. The Fall Forward Price Guarantee will ensure that the product price you receive in the commitment period offered through December 14, 2018 will be the lowest offered price through September 14th of 2019. If prices decline you will not only receive the lower price for any subsequent purchases, but you will also be credited the difference for any products previously purchased. For example, if you committed to purchase one case of Iprodione by December 7, 2018 at \$256.00 and then on July 6, 2018 the case price dropped to \$200.00 we would automatically rebate you the \$56.00 difference as a result of the change in price. Furthermore, if prices increase you will not see any change in your pricing structure. For example, if you committed to purchase one case of Iprodione by December 7, 2018 at \$256.00 and then on July 6, 2019 the price increased to \$290.00 per case you would continue to receive the \$256.00 per case price offered to you during the commitment period.

The Ecotronics ECO-6 is the latest in technologically advanced digital control panels for injection equipment. Included in the control panel is a 7-inch full color HMI touch screen allowing you to easily view input usage and control settings. Its microprocessors accurately control the speed of the pumps in proportion to flow, permitting the simultaneous pumping of up to four different inputs all at different rates and formulation. The ECO-6 is very user friendly. Once the controller is pre programmed you will only need to make simple adjustments throughout your growing season.

ADVANCED MULTIPLE INPUT INJECTION SYSTEMS

INJECT PERFORMANCE, CONSISTENCY AND CONTROL

24 Hour Digital Timer

This simple and easy to use digital timer provides you with the ability to program your system activity for up to 24 hours in conjunction with your irrigation schedule. The timer allows you to program both the start and end of your injection cycle.

Run Relay Control

The run relay control is just one of the safety features built into the Eco-6 Control Panel. This feature will not allow the injection process to operate if water is not flowing through the irrigation system.

Proportional Flow Control

The ECO-6 Control Panel is able to read and calculate the flow of water through the irrigation system. As the water pressure increases or decreases the ECO-6 Control Panel is able to instruct the pump to alter the pumping speed. The end result is a uniform application rate even if the flow of water is not constant.

7 Day Digital Clock

The seven day clock feature allows you to establish your injection schedule for the entire week in one simple visit to the control panel. This feature is ideal for weekend use.

Application Rate Calculator

This software feature allows the user to input the desired application rate and irrigation cycle times. The calculator will provide the user with the appropriate micrometer settings. This feature allows calculations to be performed with flawless precision. Standard inputs including urea sulfuric acid, wetting agent and fertigation blends come pre-programmed with your ECO-6 Control Panel.

Injectable Inputs

The ECO-6 serves as the control center to allow you to inject plant nutrients, water quality and wetting agents. The ECO-6 comes standard with 2 input connections and an option to add 2 more.

Support

Technical, educational and product support is available for the Ecotronics Systems. Each control box is modem compatible allowing our technicians to diagnose remotely.
