

Lawn & Landscape

PRODUCT GUIDE

Our Brands

People Powered. Solutions Driven.

The only sustainable competitive advantage any company will ever achieve will be based upon the character and caliber of its people. Good ideas come and go, but it's our people who provide the lasting value. We can't bring lasting value by just being the least expensive. We believe enduring value happens when our solutions grow our

customers' businesses and improve their operation. To that end, improving our environment has increasingly become a core focus of our company. Across the industry segments we serve—golf, landscape, ice melt—we are working hard to solve the challenges facing our customers with an eye on improving our water, our soil and our shared future.

Step into the future with SynaTek.

Exceeding our customers' expectations today demands that we always look ahead, developing the products and technologies that keep our partners healthy and profitable no matter what the future brings. Find out more at SynatekSolutions.com or contact us at 1-800-408-5433 or info@SynatekSolutions.com.

Our vision is to positively impact every business owner, employee and family in the environments they work, play and live by providing every day products that are safe, effective and environmentally focused and technologies that create operational efficiencies and maximize revenue.

SynaTek | REACH

The distribution arm of SynaTek Solutions channels manufacturers' quality products to local businesses. Reach focuses on what your business needs, not checking boxes and sending invoices.

Branch Creek

Fueled by concern for our planet, Branch Creek is committed to creating earth-friendly alternatives to synthetics, designed to perform at the highest level and priced to fit growing efforts big and small.

Eco Electronics

Our technology arm encompasses hardware—our injection control panel, mix transfer system and control panel, and new CoreMax48—as well as software like taskTracker, a labor tracking software.

Secure WINTER PRODUCTS

A full range of innovative ice melt technologies that balance the demands of safety, cost and efficacy with an awareness of the impact these products can have on the environment.

Packaged Liquid Fertilizer

Products >

Packaged Liquid Fertilizer

Microplus is a premium liquid chelated iron fertilizer that ensures both ease of application and a very rapid plant response. Microplus is highly compatible with plant protection materials and liquid fertilizers.

Available in 2.5 gal, 250 gal & bulk gal

MicroTek is a complete & balanced water soluble micro-nutrient package with boron, copper, magnesium, iron, sulfur, manganese, and zinc. MicroTek also contains humic & fulvic acid and is chelated with citric acid.

Available in 10 x 5 lb case

20-0-3 is a high quality lawn care blend recommended for spring and fall applications. It is available with 50% SCRNs and also 75% SCRNs formulations.

Available 2.5 gal, 250 gal & bulk gal

16-3-3 50% CRN Liquid Tree & Shrub is designed to maximize healthy growth in turf, trees, and shrubs through deep root feeding.

Available in 2.5 gal, 250 gal & bulk gal

9-18-5 is a liquid fertilizer to be used where phosphorus and potassium are needed the most. Excellent for hydro seeding and turf establishment as well as for annual flowers and bedding plants and for feeding trees in shrubs. This product can be applied foliarly or deep root injection. Mechanical agitation is not required.

Available in 2.5 gal, 250 gal

MOST is SynaTek's premium complete natural based fertilizer specifically blended for turf and ornamental plantings. This natural based material, in its pre-mixed state, boasts an 8:1 carbon to nitrogen ratio, and delivers a uniform, dust-free, low odor fertilizer consistency. Potassium, an essential element for plant health and vigor, is delivered without soluble salts in a low burning sulfate formulation. MOST also contains an extensive micronutrient package, precisely assembled to satisfy the fertility requirements for plant and soil, often overlooked in other products.

Grass Seed

[Products >](#)

Grass Seed Blends

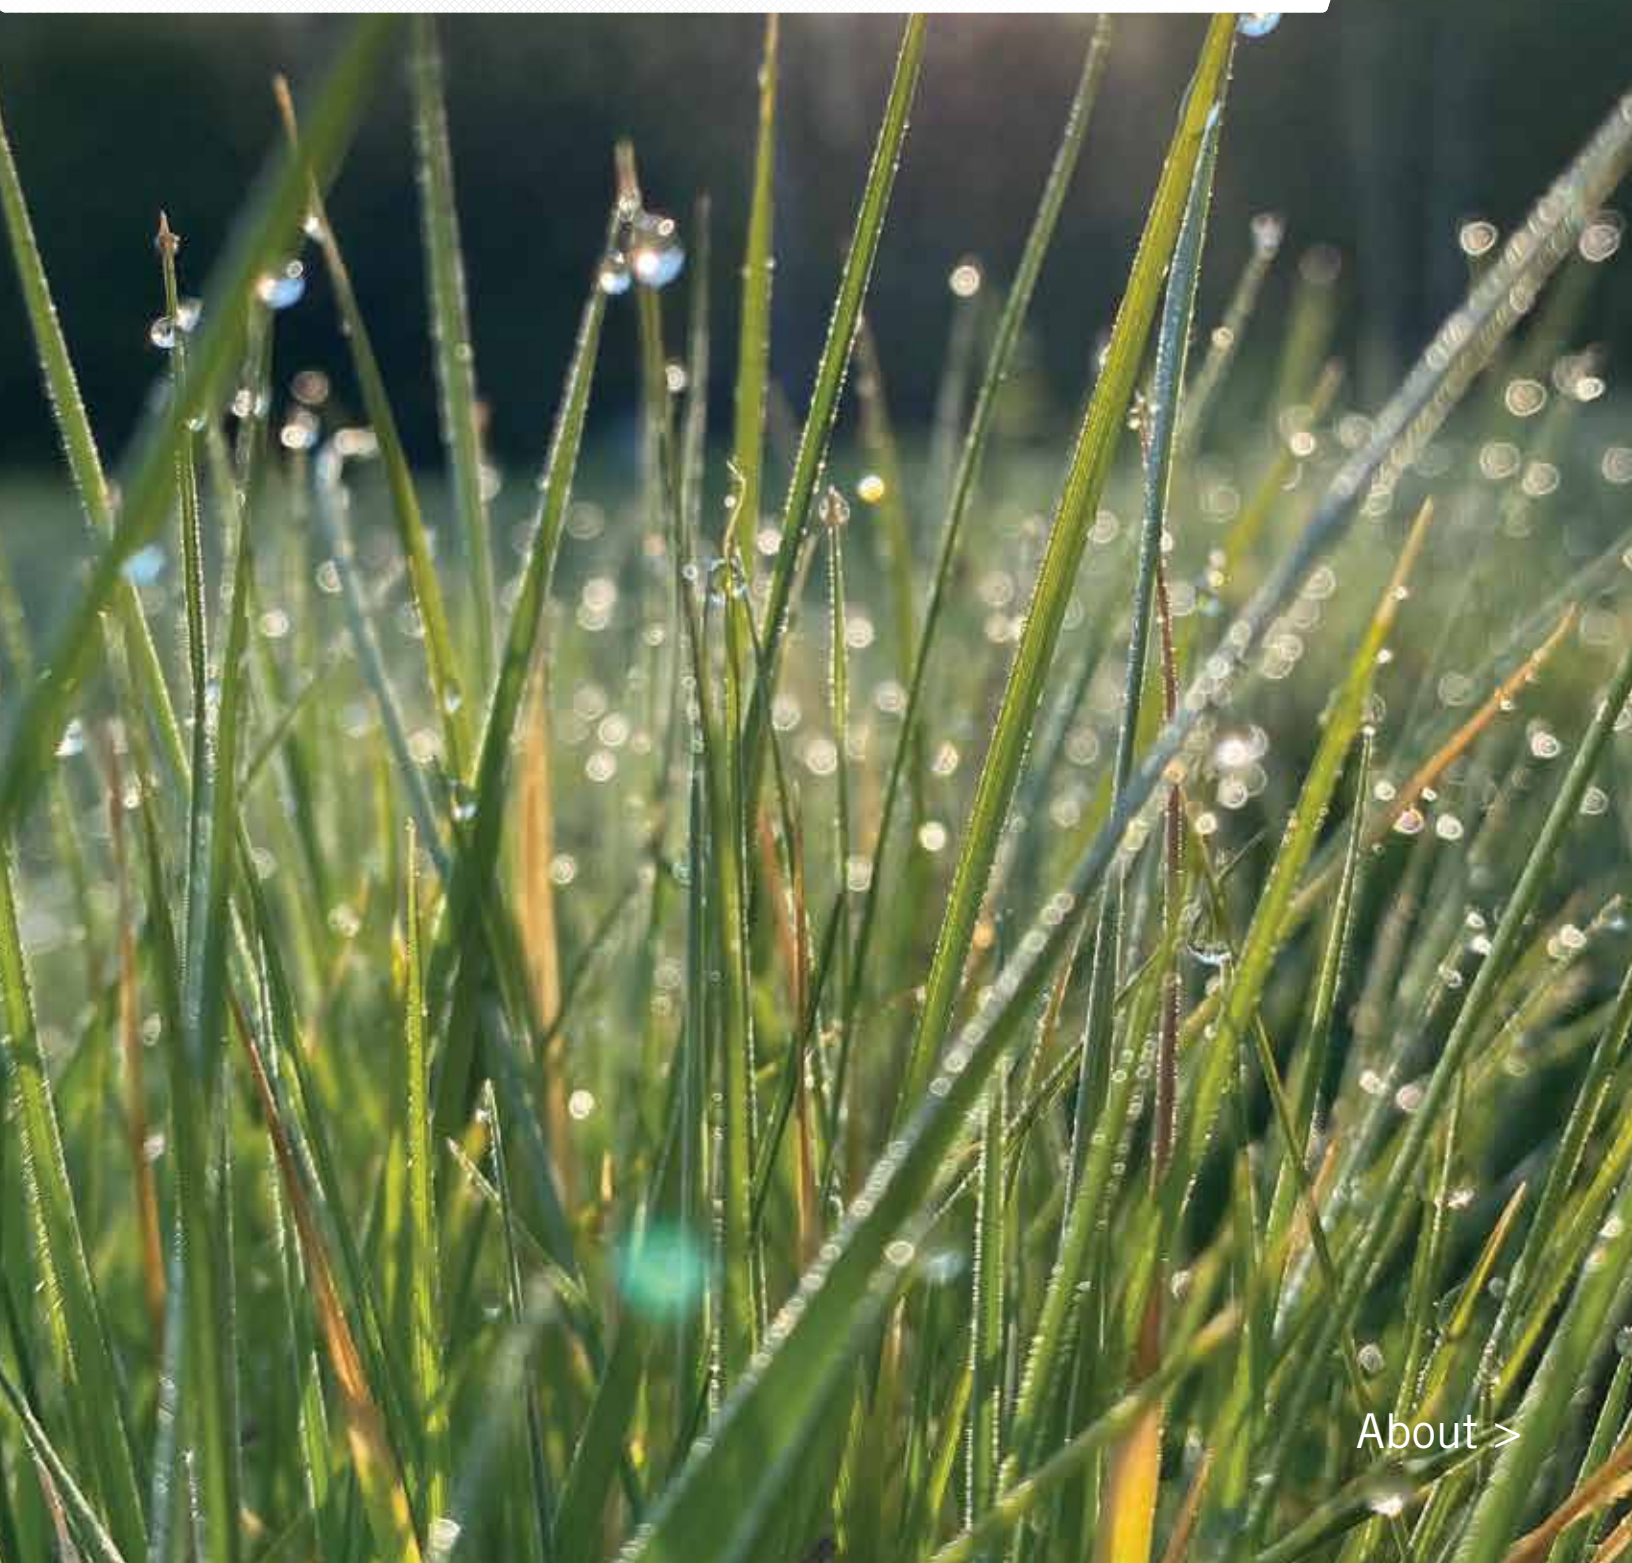

Seeding Blends and Mixtures	Varieties	Features	Seeding Rate
Fescue 80/20 Mix (BT)	80% Turf-Type Tall Fescue, 20% Perennial Ryegrass (Blue Tag Certified)	Durable turf for heavy traffic areas. Drought and heat tolerant. Finer texture and good dark green color.	6-8 lb
Stadium Elite Pro (BT) (25 lb & 50 lb Bag)	70% Tall Fescue, 20% Perennial Ryegrass, 10% Kentucky Bluegrass (Blue Tag Certified)	Premium blend of top-rated tall fescue, perennial ryegrass and kentucky bluegrass performers from NTEP trials. Compact growth and high genetic color. Drought, wear and disease tolerant. Good for golf courses, sports fields and home lawns. A-List Varieties.	6-8 lb
Three Way Tall Fescue (BT)	100% Turf-Type Tall Fescue (Blue Tag Certified)	Drought, heat, wear and disease tolerant lower growing, good color and density. Tolerates sun or shade.	6-9 lb
Triple Play Rye Mix	100% Perennial Ryegrass	Good value blend. Dark green and fine texture. High endophyte.	4-6 lb
Annual Ryegrass	100% Annual Ryegrass	Ideal grass for quick establishment of temporary turf.	5-10 lb
Contractor's Blend	50% Perennial Ryegrass and 50% Annual Ryegrass	Quick cover for soil stabilization. Economy Blend.	7 lb
Dense Shade	50% Tall Fescue 30% Hard Fescue 10% Perennial Ryegrass 10% Chewings Fescue	Shade tolerant, quick establishment, and good color	4-5 lb
Blue Grass Master Blend (25 lb Bag)	100% Kentucky Bluegrass	Premium bluegrass blend with good color. Aggressive bluegrass for low cut turf. Excellent for golf courses and sports fields.	3-4 lb
Premium New Lawn Mix	50% Perennial Ryegrass, 25% Annual Ryegrass, 20% Tall Turf Type Fescue, 5% Kentucky Bluegrass	Fast germination for general purpose areas.	6 lb
Sports Turf Mix 70/30	70% Perennial Ryegrass, 30% Kentucky Bluegrass	Finer blade, good color and durability. Ideal for over seeding golf course and sports fields. Suitable for higher quality home lawns.	4-6 lb
Sun & Shade	35% Creeping Red Fescue, 30% Chewings Fescue, 20% Perennial Ryegrass, 15% Kentucky Blue Grass	Tolerant to sun and shady areas.	4-5 lb
Tournament 90/10 (BT)	90% Tall Fescue, 10% Kentucky Bluegrass (Blue Tag Certified)	Used in athletic fields, home lawns and commercial sites. Rugged Tall Fescue with durable Kentucky Blue Grass. Great in sun and shade.	6-8 lb
Branch Creek Evolution Mix (BT) (A-list)	40% Night Crawler Tall Fescue, 25% Rebounder Tall Fescue, 15% Fayette Tall Fescue, 10% SR 2284 Kentucky Bluegrass, 10% Tetradark Tetraploid Ryegrass	Paleo Seed Treatment increases germination rate and speed by up to 30% without a high phosphorus starter fertilizer. Increases root establishment by up to 60%. Improved weed control. Early rhizome development and aggressive tillering allow for fill in of bare spots. Thrives in full sun or up to 70% shade.	2-5 lb
 Lawn Mix	50% Perennial Rye Grass, 30% Creeping Red Fescue, 20% Kentucky Blue Grass (Blue Tag & A-List Certified)	Sun and shade mix that establishes quickly with great color.	4-5 lb

BT = Certified Blue Tag - Oregon Certified Blue Tag assures the purchaser that the seed inside the bag is the variety stated and it has met the top quality standards for germination and purity.

Branch Creek®

About >

A WORLD OF CLEANER OPTIONS FOR HOMES, FARMS, AND BUSINESSES.

Today's solutions often spell problems for tomorrow. This is especially true for lawn care and agriculture, where easy-to-use products that are priced right tend to cost our planet big.

Branch Creek understands this tug-of-war. Even more, we're working hard to end it.

We offer organics and clean chemistry that prioritize your health and the planet's without added work or sky-high spending. You catch a break and Mother Nature does, too, with smart products that in most cases work better and faster than the ones you're currently using.

WHERE WE'VE BEEN

In the past, most growing problems could be sprayed away. Rainy April? Crop damage from disease? No problem! Except one: Spraying away problems can create short term solutions that actually jeopardize your soil's longer term growing future.

WHERE WE ARE GOING

Healthier soil = healthier plants. Investing in soil not only means stronger, healthier crops and growth, but more often than not, a bump in yield, too. Regenerative solutions promise big-picture benefits for you, your growing goals, and our planet.

BRANCH CREEK ORGANICS

Branch Creek Organics inputs meet **USDA certified organics standards**, allowing growers of any size to increase their harvest without jeopardizing soil's wellbeing. This approach **ensures long-term profitability** for farmers, great results for homeowners, and a brighter future for us all.

SAFER PLAY

Finally, lawn care you need **without the chemicals you don't!** Safer Play's cleaner chemistry poses so little risk to people and our planet, it's exempt from EPA registration. **Get peace of mind and pristine results on lawns, gardens, and athletic fields.** Ditch toxic chemicals and pesticides for Safer Play.

CHLORIDE FREE

Chloride-free Entry® melts snow and ice in as little as 30 seconds! It's safer for pets, homes, and nature, won't dirty or damage floors, and **outperforms granular chloride salts at no added cost.** Discover the effective, responsible de-icer that doesn't create more problems than it solves!

TriForce™ In Action

PALEO

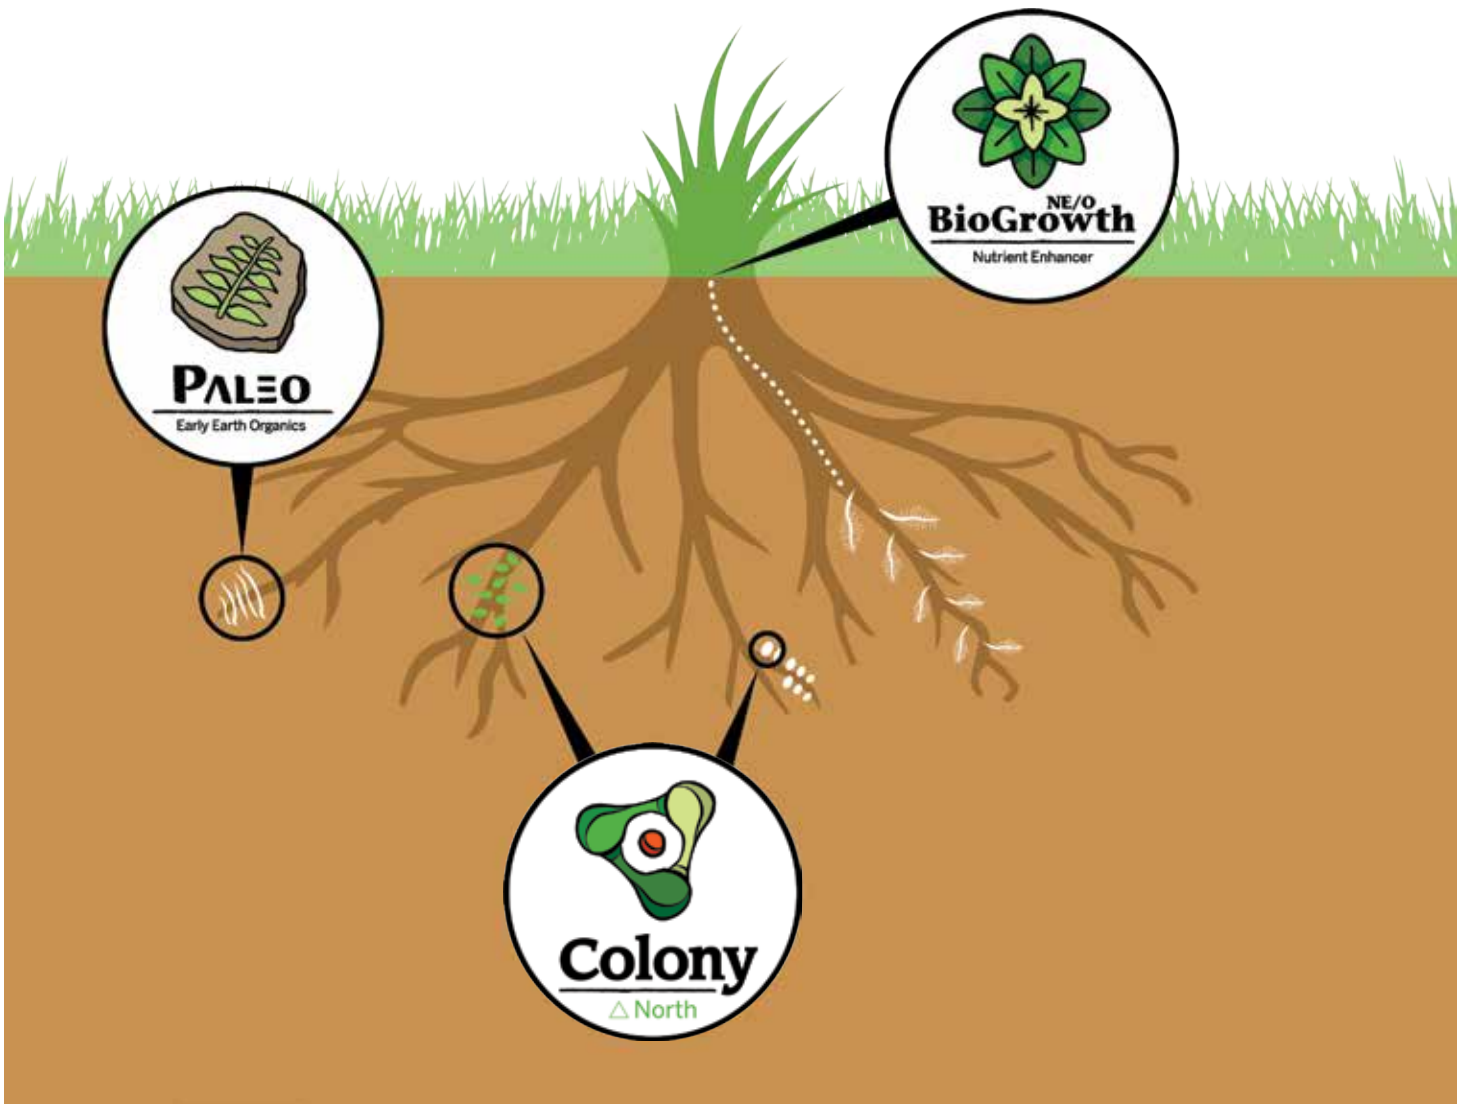

Paleo is a blend of Humic, Fulvic and Ulmic acid that acts as an organic chelator and microbial stimulator. It has a unique carbon matrix which includes a high concentration of trace minerals and organic acids. Humic acid enhances the plant's ability to take in essential nutrients and improves soil structure.

COLONY™ NORTH

Colony North™ is a microbial package that includes biology whose primary purpose is to solubilize nitrogen, phosphorus, potassium and calcium as well as increase chitinolytic and cellulolytic activity. This increase of nutrient availability allows for reduction in fertilizer usage.

BIOGROWTH NE/O

BioGrowth NE/O is a natural broad spectrum plant nutrient enhancer with a wide application window on a variety of turf grass types. It is biologically active in the plant improving plant respiration in the mitochondria. The net result is enhanced internal movement of nutrients and hormones, leading to increased root development.

Most turf grass managers agree that a quality turf grass stand is largely dependent on the health and vigor of its soil. Unfortunately, because of various environmental and culturally imposed stresses, turf grasses rarely achieve their full potential.

TriForce™ is an organic bridge product containing beneficial bacteria, humates and a nutrient enhancer that has been specifically formulated to help correct deficiencies and improve the soil structure.
