### Synatek Rewards Program

Participants in the 2021 Fall Forward Program will be able to benefit from rebates of up to 10% from purchase commitments made by December 10, 2021. Agency products offered by Syngenta, SePro and FMC are not eligible for SynaTek Rewards. For example, if a \$20,000 purchase commitment was made from qualifying manufacturers by December 10, 2021 you would receive a \$1,200 rebate based upon a rewards level of 6%. Rebates will be paid out by August 31, 2022 provided that shipment of the product takes place by the dates outlined below and payment is received by June 10, 2022.

\* In the event that the product is not shipped or paid for within the terms of the Fall Forward Program then all rebates will be forfeited.

### Extended Delivery & Payment Terms

Participants in the 2021 Fall Forward Program will benefit from extended delivery and payment terms. All purchase commitments received by December 10, 2021 will be able to defer delivery until the dates outlined below with payment for the product not being due until June 10, 2022.

#### Delivery Deadlines

Packaged: March 31, 2022

Granular: March 31, 2022

Liquid: July 31, 2022

\* In the event that the product is not shipped or paid for within the terms of the Fall Forward Program then all rebates will be forfeited.

### Early Pay Discounts

The following payment discounts are available for customer's who elect to pay for their early order commitment prior to the June 10, 2022 due date.

**6% if paid by December 17, 2021**

**3% if paid by March 31, 2022**

**2% if paid by April 29, 2022**

## Product Swap

Participants in the 2021 Fall Forward Program will be able to make purchase commitments from qualifying manufacturers without needing to fully predict disease and insect pressures for the coming season. The Fall Forward Product Swap will allow you to exchange up to 25% of your control product purchases (excluding control product on fertilizer) until July 10, 2022 once you have a stronger gauge of your course's particular needs. The exchange privileges are offered on a one time basis and must be exchanged for products with an equal or greater price compared to the products being exchanged. For example, if you made a \$10,000 purchase commitment by December 10, 2021 for eligible products you would be able to exchange up to \$2,500 of those products on a one-time basis by July 10, 2022 with a minimum of \$2,500 in other eligible products.

## Price Guarantee

Participants in the 2021 Fall Forward Program will be able to make purchase commitments on all control products (excluding control product on fertilizer) without the budgetary stress and strain of trying to predict the future of product pricing. The Fall Forward Price Guarantee will ensure that the product price you receive in the commitment period offered through December 10, 2021 will be the lowest offered price through September 10, 2022. If prices decline you will not only receive the lower price for any subsequent purchases, but you will also be credited the difference for any products previously purchased. For example, if you committed to purchase one case of Iprodione by December 10, 2021 at \$256.00 and then on July 6, 2022 the case price dropped to \$200.00 we would automatically rebate you the \$56.00 difference as a result of the change in price. Furthermore, if prices increase you will not see any change in your pricing structure. For example, if you committed to purchase one case of Iprodione by December 10, 2021 at \$256.00 and then on July 6, 2022 the price increased to \$290.00 per case you would continue to receive the \$256.00 per case price offered to you during the commitment period. **Excludes all MLP and Agency pricing.**

**\*\* PRICE GUARANTEE IS LIMITED TO PRODUCTS PURCHASED DURING FALL FORWARD. PRICE GUARANTEE IS LIMITED TO QUANTITY PURCHASED DURING FALL FORWARD.**

## What's Included?

### 19-0-4 (35% CRN) w/TriForce™

19-0-4 (35% CRN) with TriForce™ has been specifically engineered to maintain a strong base of downward root growth without promoting shoot growth. TriForce contains three essential products Colony Complete, Paleo, and BioGrowth. These products are responsible for nutrient stabilization, thatch reduction, and new root growth development. This blend also includes Triazone a slow release and free Nitrogen. At the 1/8 lb rate it provides you with a consistent nutrient release over two weeks.

### MicroTek

A complete foliar nutritional with a balanced analysis of the essential micronutrients needed to make grass green and healthy without additional growth. These products include magnesium, boron, cobalt, copper, iron, manganese, molybdenum and zinc. It contains the non-plant food ingredient fulvic acid to improve nutrient availability to the turf, enhance photosynthesis, and magnify root growth. MicroTek boasts an 8:5 iron to magnesium ratio outpacing the competition in both available nutrients and quick green.

### NutriGrow Magnum

NutriGrow Magnum has a balanced pH of 6.3 and at 6 pounds provides one of the highest rates of PO<sub>3</sub> in the industry. With its patented N-Rich Technology Magnum has been shown to prevent and suppress disease, particularly Pythium.

# The Volution™ Solution Bundle

The Volution™ products Clean, Start, Control and Activate will provide you with the necessary adjuvants for an effective and economical spray application.

## STEP 1

Volution™ Clean is a high performing and easy to use mix tank and spray system cleaner. Clean is formulated with a combination of detergents and emulsifiers that helps to clean and solubilize residues. Clean will penetrate dried on residues to free them up and get it back into a sprayable solution.

Clean also helps to solubilize oily residues from emulsifiable concentrates or oil based formulations to ensure that any leftover active ingredient is eliminated.

Clean is a non-corrosive formula which can have negative effect on your pumps, hoses and fittings.

## STEP 2

Volution™ Start is a pH acidifier that protects spray mixes from loss of performance associated with high pH. Start is formulated with a citric acid that safely lowers pH to ensure performance of sensitive chemistries. It also contains a surfactant that reduces the surface tension of your spray solution to allow less soluble products to get into a good homogenous mix.

Start includes an antifoam to reduce foaming during agitation.

## STEP 3

Volution™ Control is formulated with a combination of modified vegetable oils to reduce driftable fines and get more of the intended product to the targeted leaf surface.

Control also reduces droplet bounce for your spray solution by absorbing the kinetic energy that a spray droplet gains when leaving the nozzle and heading towards the plant.

Control has low use rates and mixes very well with limited agitation.

## STEP 4

Activate is a non-ionic surfactant that increases coverage for better uptake. It also uses a unique and advanced polymeric component that safely increases penetration across waxy cuticles for plant better utilization.

## Bundle Includes

- 1 Case Of Each
- 4 X 1 Gallons Volution Clean
- 4 X 1 Gallons Volution Start
- 4 X 1 Gallons Volution Activate
- 4 x 1 Gallons of Volution Control

# THERE'S AN EASIER WAY TO GOOD KARMA

You'd do anything to protect your turf from the devastating effects of *Pythium*, but it's really not that complicated. Treat your turf early and be rewarded later. That's the power of Karma™. This highly systemic fungicide delivers maximum returns when used as a preventative in early spring, but it can also be used as a curative treatment in the summer. A multi-site mode of action also makes it an excellent resistance management tool.

## THE TRUE PATH TO PYTHIUM-FREE TURF

- » Prevents and cures many *Pythium* diseases, including damping-off, cottony blight, grease spot and root rot
- » Highly systemic for quick absorption and translocation
- » Multi-site mode of action prevents resistance problems
- » Can be applied following germination or to established turf
- » Suitable for tank-mixing to broaden disease-control spectrum
- » Prevents root rot and damping-off caused by *Pythium* spp. and *Phytophthora* spp. at all stages of ornamental propagation

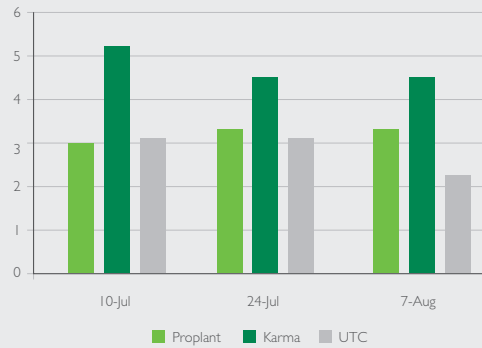

# PYTHIUM DISEASES CONTROLLED

- » Cottony blight
- » Damping-off
- » Grease spot
- » Root rot
